

TOPICS

- **Weed & Plant Identification**

Common weed species for the area will be thoroughly covered. Beneficial plant species that are commonly found naturally and planted in buffer projects will also be covered.

- **Weed Control Methods**

We will discuss the most effective methods of control for the species covered.

- **Pest Control**

We will briefly discuss common pests and strategies to minimize damage.

- **Basic Maintenance Tips**

We will provide you with tools to help determine how your planting is doing and where to go from there.

- **Questions?**

We will allow time for open discussion; feel free to bring in plant samples that have you stumped.
