Lake association members and volunteers labeled storm sewers surrounding Big Lake and Mitchell Lake Monday morning.

Volunteers labeled storm sewers from Gulf Street to Hwy. 10 and in the parking lot at Lakeside Park.

"It took about two hours," said lake association member Jane Ramunno. "It is an easy application and a lot was accomplished in a short amount of time."

The group had 250 storm sewer labels for the area of Big Lake and Mitchell Lake along with informational door hangers for residents housed by the storm drains.

The group of seven included Ramunno, association member Gail Jones, Public Works Director Mike Goebel, volunteers Justin Seifert, Jami and Sami Swanson and Sam Adams.

As part of the association's attempt to educate the public about pollution, Ramunno and Goebel worked together for the project.

After receiving their SCORE grant they designed the precautionary labels and door tags.

"We intend to do more in the fall and will again be looking for volunteers and groups to help," says Ramunno.
